## Non-Slip Floor & Concrete Strength Ceramic Mortar

### Performance

1. Quick Hardening (Works in 30 Minutes / Traffics in 60 Minutes)
2. Wet Surface Construction
3. Gore-Tex / Everlast Non-Slip
4. Non-Combustible Material
5. Strong Adhesion / Excellent Compressive Strength
6. Non-Hazardous Substances

### Application

1. Emergency Repair Uses
  - Highway / Airport Runway / Road repair / Concrete reinforce
2. Expansion Joint Area of the Bridge & Highway
3. Constantly Water-Soaked Concrete
  - Kitchen / Haccp factory / Fish Market / Car wash / Quayside
4. Restoration of Concrete Sections

### Construction Thickness

20mm ~ 100mm

## Frozen Warehouse Floor & Quick Hardening Ceramic Mortar

### Performance

1. Sub-Zero Temperature Construction (-30°C ~ +40°C)
2. Construction without Shutdown
3. No Contraction and Expansion during Hardening
4. High Strength Low Elastic Modulus
5. Dust Free (Excellent Wear Resistance)
6. Quick Hardening

### Application

1. Refrigerated Warehouse
2. Cold Storage
3. Sub-zero Temperature (the winter season) Construction

### Construction Thickness

30mm ~ 60mm

## Exterior Wall Waterproof & Finishing Ceramic Mortar

### Performance

1. Non-Combustible Material
2. Waterproof Performance & Air Permeability
3. Quick Hardening & Strong Adhesion
4. Seismic Performance & Long-Lasting Durability
5. Plastering & Spray Construction
6. Colored Waterproof Coating Finish

### Application

1. External Insulation Non-combustible Finish
2. Exterior Wall Waterproofing
3. Background Reinforcement Filler

### Construction Thickness

5mm ~ 10mm
